# Number of involuntary part-time workers in February 2021 down from record highs

MARCH 10, 2021

The number of people at work part time for economic reasons, also called involuntary part-time workers, totaled 6.1 million in February 2021. This was down from 10.9 million in April 2020 but is 1.7 million higher than in February 2020. These workers would have preferred full-time employment but were working part time because their hours had been reduced due to slack work or they were unable to find full-time jobs.

The share of the employed who were involuntary part-time workers increased sharply following the onset of the COVID-19 pandemic, as businesses around the country cut back operations in response to the pandemic and efforts to contain the spread of the virus. The share was 2.8 percent in February 2020 but rose to 8.2 percent in April 2020. By February 2021, this share had fallen to 4.1 percent. The rapid rise of involuntary part-time work and subsequent decline occurred almost entirely among those whose hours were cut due to slack work or business conditions; the changes among those who could only find part-time jobs were comparatively small.

Bureau of Labor Statistics, U.S. Department of Labor, *The Economics Daily*, Number of involuntary part-time workers in February 2021 down from record highs at <a href="https://www.bls.gov/opub/ted/2021/number-of-involuntary-part-time-workers-in-february-2021-down-from-record-highs.htm">https://www.bls.gov/opub/ted/2021/number-of-involuntary-part-time-workers-in-february-2021-down-from-record-highs.htm</a>
