

Economic Growth Region 8

Statistical Data Report for July 2016, Released September 2016

Regional and State Unemployment (seasonally adjusted)

Unemployment rates were significantly higher in July in seven states, lower in three states, and stable in 40 states and the District of Columbia, the U.S. Bureau of Labor Statistics reported. Ten states and the District had notable unemployment rate decreases from a year earlier, three states had increases, and 37 states had no significant change.

In July, two regions had unemployment rates significantly different than the U.S. rate of 4.9 percent: the Midwest, at 4.5 percent, and West, at 5.3 percent. Over the month, the Midwest had the only statistically significant unemployment rate change (-0.2 percentage point). Significant over-the-year rate decreases occurred in three regions: the South (-0.5 percentage point), West (-0.4 point), and Northeast (-0.3 point).

 Note: Historical data for the most recent 5 years (both seasonally adjusted and not seasonally adjusted) are revised near the beginning of each calendar year, prior to the release of January estimates for statewide data.

Industrial Production

Industrial production in July saw the biggest one-month gain in 20 months, suggesting that the factory sector could be on the mend. Factory production in the U.S. grew 0.5 percent last month, the fastest pace in a year, as mining rebounded and utility use climbed, data from the Federal Reserve showed. Total industrial production jumped 0.7 percent, more than double the median estimate of economists in a Bloomberg survey. Utility use increased 2.1 percent, the same pace as in June, and mining rose 0.7 percent after a 0.3 percent drop a month earlier, the report showed. (Daily Labor Report)

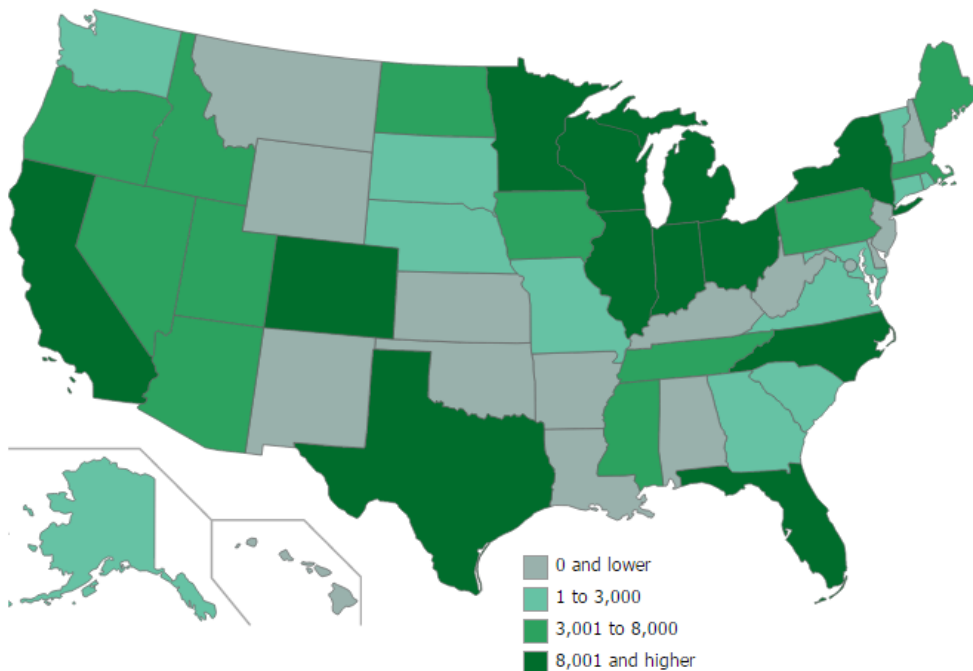

Durable Goods Orders

Demand for long-lasting factory goods rebounded in July, a sign the manufacturing sector could continue to stabilize in the second half of the year. New orders for durable goods—aircraft, industrial machinery, and other products designed to last at least three years—rose a seasonally adjusted 4.4% in July from the prior month, the Commerce Department said, the largest monthly jump since October. (Daily Labor Report)

Nonfarm Payroll Employment Changes by State

In July 2016, 15 states had statistically significant over-the-month increases in nonfarm payroll employment in July 2016. The largest job gains occurred in New York (+37,500), California (+36,400), and Florida (+28,100). In percentage terms, the largest increases occurred in North Dakota and Vermont (+1.0 percent each), followed by Maine (+0.7 percent). The only significant decrease in employment over the month occurred in Kansas (-5,600, or -0.4 percent). (The Economics Daily)
